To Love, Care, and Pray Destitute Babies Back to Health; or into Jesus Loving Arms

Above: A starving ill two and a half year old.

Dear Welcome Home Friends and Family,  
**All these children are now healthy !!!!**

Thank you for your hearts and hands extended to our little ones. We are very much aware that our work in Uganda could not go on without your participation. Your love and support to make things possible and I assure you it is really much appreciated.

This month I want to take you down memory lane with us to look at some little lives that you have helped transform into healthy happy children. When you have seen many of our happy pictures it is easy to forget we are helping prevent little ones from getting into a desperate place of need like the ones pictured.

Apart from children in the home, we are helping give nutrition to several others; we give medical care where it is needed to children whose families come to our home and we have 2 medical clinics a month in two of the poorest villages in our area. We help supply needed items and nutrition to some poor children in hospital that would otherwise not get it. We supply meals for the poverty stricken mothers of children in the hospital so they can care for them there.

**Do you know anyone that you could ask to come alongside us and be part of our financial support?** Giving is down and some of our dear older faithful partners are no longer with us. The only funds that are spent in America pay for postage and envelopes. Our church Calvary Life Fellowship pays for our newsletters. We are all volunteers and have our office in Mandy's home. No westerners are paid for their work. The many children we touch in Uganda - be it at the home or village - are a great worthwhile investment.

Thank you for your continued love and support.

***Blessings from Mandy  
and Your Welcome Home Family***

Above Large umbilical hernia we repaired

Above: Nine months old weighing only 7lb

Above: AIDs and starvation nearly took a life

Above: These are severely neglected twins.

Above: TB and starvation takes it toll.
